SUBJECT INDEX

VOLUME 60

- Acridine
 - microbial metabolism, 483
- AIDS
 - human immunodeficiency virus, 386
- Artemisinin
 - treatment of malaria, 301
- Bioremediation
 - oil spills, 342
- Branhamella catarrhalis*
 - epidemiology, 267
 - immune response, 267
 - surface antigenic structure, 267
- Burkholderia cepacia*
 - cystic fibrosis, 539
- Cystic fibrosis
 - B. cepacia*, 539
 - P. aeruginosa*, 539
- Cytokines
 - induction by bacterial modulins, 316
 - tissue pathology, 316
- Degradation
 - acridine, 483
 - pyridine, 483
 - quinoline, 483
- Development
 - D. discoideum*, 135
 - genetic networks, 135
 - myxobacteria, 70
- Dictyostelium discoideum*
 - development, 135
 - genetic networks, 135
- Drugs
 - efflux systems, 575
- Efflux
 - multidrug systems, 575
- Endoperoxides
 - treatment of malaria, 301
- Enteric toxins
 - classification, 167
 - intestinal secretion, 167
 - mechanism of action, 167
- Envelope glycoproteins
 - human immunodeficiency virus, 386
 - influences on immune functions, 386
- Escherichia coli*
 - gene expression, 512
- Ether bonds
 - scission by bacteria, 216
- Flow cytometry, 641
- Food industry
 - glucose isomerase, 280
- Frameshifting
 - programmed, 103
- Gene expression
 - E. coli*, 512
 - strategies for achieving high levels, 512
- Glucose isomerase
 - industrial applications, 280
 - molecular aspects, 280
- Heterocyclic compounds
 - microbial metabolism, 483
- Histidine
 - synthesis, 44
- Human immunodeficiency virus
 - activation of T helper cells, 722
 - envelope glycoproteins, 386
 - pathogenesis, 386
- Interfaces
 - surface-active compounds, 151
- Internal ribosome entry site
 - picornavirus translation, 499
- Intestinal secretion
 - enteric toxins, 167
- L-A virus, 250
- Malaria
 - treatment with artemisinin, 301
- Methanotrophs, 439, 609
- Modulins
 - induction of cytokine synthesis, 316
- mRNA
 - turnover in *S. cerevisiae*, 233
- Mucoidy
 - P. aeruginosa*, 539
- Murine mammary tumor virus
 - superantigen, 473
- Myxobacteria
 - development, 70
 - group behavior, 70
- Nematodes
 - symbiosis with *Xenorhabdus* and *Photorhabdus* spp., 21
- Oil spills
 - bioremediation, 342
- Phospholipids
 - biosynthesis, 1
 - S. cerevisiae*, 1
- Photorhabdus* spp.
 - pathogenesis, 21
 - symbiosis with nematodes, 21
- Picornavirus
 - internal ribosome entry site, 499
 - regulation of translation, 499
 - RNA-protein interactions, 499
- Pollutants
 - ether bonds, 216
- Polyphasic taxonomy, 407
- Protists
 - secretory pathway, 697
- Proton motive force
 - multidrug efflux systems, 575
- Pseudomonas aeruginosa*
 - cystic fibrosis, 539
- Pyridine
 - microbial metabolism, 483
- Quinoline
 - microbial metabolism, 483
- Ribosome
 - regulation by nascent peptide, 366
 - two-gene operons, 366
- RNA-protein interactions
 - picornavirus translation, 499
- rRNA
 - polyphasic taxonomy, 407
- Saccharomyces cerevisiae*
 - L-A virus, 250
 - mRNA turnover, 233
 - phospholipids, 1
- Secretory pathway
 - protists, 697
- Soil microorganisms
 - control of atmospheric trace gases, 609
- Superantigens, 473
- Surface-active compounds
 - interaction of bacteria with interfaces, 151
- Systematics
 - polyphasic taxonomy of bacteria, 407
- T helper cells
 - human retroviral pathogenesis, 722
- Taxonomy
 - polyphasic, 407
 - rRNA, 407
- Trace gases
 - control by soil microorganisms, 609
- Translation
 - frameshifting, 103
 - inhibition by nascent peptide, 366
 - picornavirus RNA, 499
 - two-gene operons, 366
- Viruses
 - human immunodeficiency virus, 386, 722
 - human T-cell leukemia virus, 722
 - internal ribosome entry site, 499
 - L-A, 250
 - murine mammary tumor virus, 473
 - picornavirus, 499
 - superantigens, 473
- Xenorhabdus* spp.
 - pathogenesis, 21
 - symbiosis with nematodes, 21
